1. Freelance & Job Portal (Angular + Spring Boot) (Ongoing)

Developing this project as an academic module to utilize and improve my practical knowledge on web application development on the frontend and backend sites.

Technologies that are using in this project: Mainly, I am using Angular for frontend and Spring-Boot for backend. The other technologies are Java, Spring, Spring MVC, Hibernet, Spring Security, Restful Web Services, HTML, CSS, JavaScript, Typescript, jQuery, Bootstrap etc.

2. Garments Factory Management (Java Swing)

Designed this project to manage the operations of a garments factory. The project was developed using the Java Swing framework and provided an intuitive and user friendly interface for managing various aspects of the factory's operations such as employee management, inventory management, order management, financial management and so on.
